

RADIO/RADAR/INERTIAL NAVIGATIONAL SYSTEMS

(C-130H)

-
- 1. Objective.** As prescribed in AFI 38-201, *Determining Manpower Requirements*, this Air National Guard Manpower Standard (ANGMS) quantifies the full-time manpower required to accomplish the tasks described in the work center description.
 - 2. Authority.** The AFI 21-series of Air Force (AF) and/or Air National Guard (ANG) directives contain US Air Force and Command policy and procedural guidance for the Radio/Radar/Inertial Navigational Systems work center. This manpower standard was developed using the functional review process under procedures outlined in AFPAM 38-208V1, *Air Force Management Engineering Program (MEP) Processes*, formerly AFR 25-5.
 - 3. Applicability.** This standard applies to all Air National Guard C-130H airlift units except the 109th and 139th Airlift Groups, the 123rd Airlift Wing, and the 176th Composite Group. This standard only applies to peacetime operations.
 - 4. Standard Data:**
 - a. Classification. Type II.
 - b. Approval Date. 9 July 1992.
 - c. Man-hour Data Source. Operational Audit method (historical record and technical estimate techniques).
 - d. Standard Man-hour Equation. $Y = 702.4 + 1.087X$.
 - e. Workload Factor:
 - (1). Title. A C-130H Programmed Flying Hour.
 - (2). Definition. The average monthly programmed flying hours.
 - (3). Source. USAF Program Document, Volume II, maintained by NGB/FM.
 - 5. Application Instructions:**
 - a. The valid man-hour range for this ANGMS is 633.65 through 1071.71.
 - b. This ANGMS is appropriate for use with all peacetime civilian man-hour availability factors.
 - c. Refer to the appropriate column in the standard manpower table at attachment 2 to determine the grade and skill distribution.
 - d. Should the extrapolation limits be exceeded, see AFI 38-201, *Determining Manpower Requirements*, for guidance.
 - 6. Statement of Conditions:**
 - a. There were no general conditions (environmental, equipment, or facility) which had an impact on the development or application of this manpower standard.
 - b. There were no approved enhancements that impacted the man-hour equation for this work center.
